

Academic Background and Courses

Universidade Veiga de Almeida <i>Bachelor's Degree in Information Systems</i>	Rio de Janeiro, RJ Feb. 2026 – In progress
Introduction to Web Development with HTML, CSS and JavaScript – IBM (Coursera)	
JavaScript Basics - UC Davis (Coursera)	
Git and GitHub - Javanauta	
Bootcamp Santander 2026: AI React Front-end (DIO)	

Experience (Hackathons)

Front-End Developer <i>IBM Bob Dev Hackathon</i>	May 3–5, 2026 Remote
- I was responsible for the complete development of the React + Vite interface, ensuring componentization, performance, and usability. - I assisted my teammate with the Django back-end setup, integrating with PostgreSQL and structuring the API endpoints. - I worked with CI/CD pipelines via GitHub Actions for automated test execution. - I collaborated in a 5-person team using the Agile methodology, delivering 3 complete project phases.	
Front-End Developer <i>BrightData AI Agents Hackathon (lablab.ai)</i>	May 25–31, 2026 Remote
- I was responsible for the complete front-end of the Open Resource platform, using React (Vite), reusable components, and a custom design system. - I developed interactive components: Badge, SkillTag, Score Ring, Skeleton, and Toast — all integrated with the APIs.	

Projects

FinFreela React (Vite), Node.js, Express, PostgreSQL	June 2026 – Present
- Developing a full-stack web application for freelancer financial management. - Currently refactoring the project's architecture (originally built with Firebase and SQLite) to a custom REST API using Node.js and PostgreSQL. - Implemented features such as transaction CRUD, monthly filtering, monthly trend chart, and CSV export. - Structured user authentication and protected routes with direct integration between the React front-end and the custom back-end.	
Sabor & Brasa – Restaurant Website HTML5, CSS3, JavaScript, PHP, MySQL	May 2026
- Designed and developed a multi-page, responsive, and dynamic institutional website for a fictional steakhouse. - Created a relational database (MySQL) for product management, with content integrated via PHP.	
Dev Girls – Personal Website HTML5, CSS3, and JavaScript	May 2026
- Developed a multi-page website for a fictional web development agency as part of a 4-person team. - Implemented a responsive navigation menu, individual profile pages, a services section, and a contact page.	

Technical Skills

Languages: JavaScript, TypeScript, HTML/CSS
Frameworks: React (Vite), Node.js, Express
Databases: PostgreSQL, MySQL, SQLite, Firebase
DevOps: Git, GitHub Actions, VS Code
AI and Methodologies: IBM WatsonX, Scrum/Kanban, AI Agents
